

# DriverSIM by Tideworks

DriverSIM by Tideworks provides software to supplement operator training in a simulated environment. Customize to match your operations. Green, safe, repeatable training for your terminal.

1

**Green** - Reduce in-vehicle training and emissions by supplementing your training with simulations.

2

**Safety** - Improve driver skills and confidence with repeatable training on high-incident yard maneuvers at no risk to drivers or equipment.

3

**Multi-user** - A multi-user environment provides drivers with the ability to interact in a safe, simulated yard space.

4

**Your Operations** - Customize to match your terminal so drivers can train in an environment that reflects your yard layout and operations.

5

**Virtual** - Optional virtual reality provides the most modern method of training for operators on your terminal.

6

**Multi-Monitor** - Compatible with multi-monitor displays for non-virtual reality training experiences.

7

**Out-of-the-box configurations** - "Basic" and "Pro" versions provide flexibility while meeting your training needs.

8

**Monitor** - Observe multiple drivers from a single location.
