# MAINSAIL

INTRODUCING THE NEW MAINSAIL.
A PERFECT 10.

COMMAND

Information at Your Command
Rapidly access and manage real-time operations data to answer all your questions, driving faster, results-oriented decision making for your terminal.

Designed for Optimal User Experience
The new Mainsail is remarkably configurable and features a user-interface so intuitive that new and seasoned team members will marvel at the experience. There are endless opportunities to customize roles, screens and workflows to efficiently meet all terminal and end-user needs.

Control of Your Bottom Line
With the robust new Tideworks Billing service your terminal can effortlessly generate invoices for services and events, tie into your accounting or ERP system, and stop revenue leakage before it starts.

Instantly find the information you need

- Access more features from a single workspace
- Easily filter and sort data, drill-down into details, and share results
- Save time by running custom, saved searches
- Quickly navigate to information and take action with system-wide keyboard short cuts
- Generate flexible, on-demand reports of your data

Completely configurable workspace

- Configure system behavior at the enterprise level, or customize usage for teams and individuals with role-based logic
- Individual users personalize their user experience to the most efficient way they work
- Leverage application themes and sizable fonts for a tailored experience in different environments
- Responsive design enables the application to be rendered on a variety of devices
- Built on a reliable, scalable, and future proof development platform

Integrates seamlessly with third party systems

- Financial and accounting systems
- Automated Gate Systems
- Optical Character Recognition (OCR)
- Radio-Frequency Identification (RFID)
- Customer proprietary applications

Containers and Ro-Ro operations in one application

- Distinctive graphics display essential information at-a-glance, such as damage and hazardous information
- Update multiple cargo records in a single mass edit
- Control RoRo operations efficiently, including critical billing services, with the same intuitive ease as containerized cargo

## Preeminent, comprehensive terminal operating system

- Import, Export & Transship processing
- Ro-Ro management and processing
- Highly configurable Billing service
- Comprehensive reporting and seamless integration with data analytics tools
- Electronic Data Interchange
- Market-leading customer web interface (Forecast®)

The new Mainsail. All the TOS you'll ever need.
